TAMPERE UNIVERSITY
OF APPLIED SCIENCES

*Library and Information
Services*

COLLECTIONS

The Library and Information Services of Tampere University of Applied Sciences (TAMK) welcomes you to its extensive and up-to-date collections and information services. The ten library units are located in Tampere, Ikaalinen, Mänttä-Vilppula and Virrat, and their services are available to everybody.

The library collections reflect TAMK's different fields of education. The printed collections include about 100 000 books, 650 journals, audiovisual material, theses and 15 000 sheet music titles. Collection details can be found in the PIRKKA and TARKKA databases. The e-resources include thousands of electronic books and journals, reference books and sheet music. You will find the e-resources in the e-resource portal Nelli.

TAMK's electronic theses are saved in the Theseus database. Printed theses can be found in the PIRKKA and TARKKA databases.

SERVICES

Registered customers can borrow items from the library, and borrowing is normally free of charge. You can renew and reserve loans and suggest new acquisitions through the library web pages.

If items cannot be found, or if it is not possible to acquire them for our collections, they can be obtained by interlibrary loan from other libraries.

If you have questions about how to find information, please contact the Information Services of the Library. Our information specialists are there to teach you how to seek information and how to use information sources. All new students are offered an introduction to the use of library services when they come to study at TAMK.

The library arranges teaching of information searching skills for all TAMK students, and for the staff and other clients on request. Courses on other subjects can be arranged, too.

FACILITIES

The library units have rooms equipped with computers for study, reading, and for working together.
